Contents of volume 80

Numbers 1,2

Special Issue:
Objects and Attention

Guest Editor:
Brian Scholl

In this issue

Regular articles

BRIAN J. SCHOLL (*Yale University*)
Objects and attention: the state of the art, 1–46

PATRICK CAVANAGH, ANGELA T. LABIANCA (*Harvard University*) and IAN M. THORNTON (*Nissan Research and Development Inc.*)
Attention-based visual routines: sprites, 47–60

JON DRIVER (*University College London*), GREG DAVIS (*Birkbeck College*), CHARLOTTE RUSSELL (*University College London*), MASSIMO TURATTO (*University of Padova*) and ELLIOT FREEMAN (*University College London*)
Segmentation, attention and phenomenal visual objects, 61–95

MICHAEL KUBOVY and DAVID VAN VALKENBURG (*University of Virginia*)
Auditory and visual objects, 97–126

ZENON W. PYLYSHYN (*Rutgers University*)
Visual indexes, preconceptual objects, and situated vision, 127–158

BRIAN J. SCHOLL (*Harvard University*), ZENON W. PYLYSHYN and JACOB FELDMAN (*Rutgers University*)
What is a visual object? Evidence from target merging in multiple object tracking, 159–177

SUSAN CAREY (*New York University*) and FEI XU (*Northeastern University*)
Infants' knowledge of objects: beyond object files and object tracking, 179–213

Number 3

Retraction notice

CLAUDIA ULLER (*Institute of Cognitive Sciences*)
Retraction Notice for the Brief Article "Goal attribution in chimpanzees", iii

Regular articles

LIONEL NACCACHE and STANISLAS DEHAENE (*Service Hospitalier Frédéric Joliot*)
Unconscious semantic priming extends to novel unseen stimuli, 215–229

MEREDITH MCKAGUE, CHRIS PRATT and MICHAEL B. JOHNSTON (*La Trobe University*)
The effect of oral vocabulary on reading visually novel words: a comparison of the dual-route-cascaded and triangle frameworks, 231–262

AHMAD ABU-AKEL (*Tel-Aviv University*) and ALISON L. BAILEY (*University of California*)
Indexical and symbolic referencing: what role do they play in children's success on theory of mind tasks? 263–281

Discussion articles

ARDI ROELOFS (*Max Planck Institute for Psycholinguistics*)
Set size and repetition matter: comment on Caramazza and Costa (2000), 283–290

ALFONSO CARAMAZZA and ALBERT COSTA (*Harvard University*)
Set size and repetition in the picture–word interference paradigm: implications for models of naming, 291–298

Brief articles

SIMONE DALLA BELLA, ISABELLE PERETZ (*University of Montreal*), LUC ROUSSEAU (*Laurention University*) and NATHALIE GOSSELIN (*University of Montreal*)
A developmental study of the affective value of tempo and mode in music, B1–B10

THIERRY NAZZI (*Centre Universitaire de Boulogne*) and ALISON GOPNIK (*University of California at Berkeley*)
Linguistic and cognitive abilities in infancy: when does language become a tool for categorization? B11–B20

JAMIE I.D. CAMPBELL and JOHNATHAN FUGELSANG (*University of Saskatchewan*)
Strategy choice for arithmetic verification: effects of numerical surface form, B21–B30
